Subject: RE: Access agreement - definition of "Professional Services Subcontractor"

Mike – I believe Paul and Mr. Sussman have been in some discussions on this site.

Subject: Access agreement - definition of "Professional Services Subcontractor"

Hi Chris,

Based on our discussion last week about CHK's concern that your contracting department has previously defined the term "professional services subcontractor," for internal use in a manner which may be inconsistent with the use in our draft access agreement, I have drafted a proposed definition of the term for us to include in our document:

For the purposes of this agreement, *Professional Services Subcontractor* shall include those subcontractors who shall be conducting site activities which generate data or information to be used for scientific purposes, e.g., surveyors or geophysical logging services. The term does not include subcontractors who provide non-data generating services, e.g., caterers.

I have pre-cleared this with the EPA Office of General Counsel and our contractor's legal department. Please let me know if this is an acceptable resolution to CHK's concerns.

Also, have you any response yet to my request on Monday regarding the availability of a potential replacement site due to the construction of the Sand Ridge well just 1/4 mile away from our site?

Regards,

Mike
